4. Customers with characteristics of vulnerability

The Product is designed for FTB, Remortgagers and Home Movers market segments, which is likely to include some customers with characteristics of vulnerability or who will experience vulnerability over time.

FTBs are less likely to have a comprehensive understanding of mortgages or the mortgage market. Therefore, they may require additional advice and support to ensure they understand the

information being presented to them and the implications of the arrangement they are entering into to reduce the risk of harm occurring. Remortgagers and Home Movers are likely to have experience of mortgage products, but we continue to support these customer types regardless of their home owning experience. New mortgages are offered on an advised basis where any characteristics of vulnerability can be considered.

We considered the needs, characteristics, and objectives of customers with characteristics of vulnerability at all stages of the design process for this Product to ensure the Product meets their needs.

We have also tested the Product to assess whether it will meet the identified needs, characteristics, and objectives of the target market, including customers in the target market who have characteristics of vulnerability.

We have in place a framework to achieve good outcomes for vulnerable customers, which includes:

- Education and training for our staff to ensure they have the appropriate skills and experience to recognise and respond to the needs of vulnerable customers.
- Suitable customer service provision and communications.
- Flexible policies, where appropriate, to support vulnerable members.
- Monitoring to ensure we continue to meet and respond to the needs of customers with characteristics of vulnerability.

Intermediaries should continue to comply with your obligations to ensure that you treat customers in vulnerable circumstances fairly.

Please contact us if you need any further information about how we support the needs of all our customers in relation to the Product.

5. Our assessment of value

We have developed a comprehensive and robust assessment process which evaluates several aspects of our business to determine the value of our mortgage product. This analysis is used to ascertain whether the Product delivers fair value for customers.

The outcomes of the assessment process are presented to the Board, allowing for challenge and further investigation before we sign-off the outcomes and share the summary of our assessment with you.

Our fair value assessment has considered the following:

Benefits	Price	Costs	Limitations
The range of features that the Product provides, the quality of the Product, the level of customer service that is provided and any other features that the Product may offer.	The interest rates, fees and charges customers pay for the Product, comparable market rates, advice fees paid to intermediaries and non-financial costs associated with operating the Product.	The cost of funding the Product and any other reductions in costs to the customer made possible by economies of scale.	Any limitations on the scope and service we provide or the features

Results of our assessment

Our assessment concluded that the Product continues to deliver fair value for customers in the target market for the Product.
