My Choices

Reference:
Business Name:

Third Party Providers (TPPs)

You will only be able to use the services of a TPP which uses the Open Banking APIs if you tick the box in this section.

If you have any Business eBanking Authorised User(s) with full rights to operate your account(s) without the need for a second authorisation we call them "Authorised Users with a Separate Mandate."

Authorised Users with a Separate Mandate

I want to permit Authorised Users with a Separate Mandate to access my accounts using the services of TPPs via the Open Banking APIs.

Important Note: If you tick the box then this will apply to all Authorised Users with a Separate Mandate.

I understand that if the TPP uses screen-scraping techniques then you cannot prevent any Authorised User from accessing my accounts through that TPP. The Authorised User will still be subject to any restrictions which I have put in place (such as the need for a second authorisation to make a payment).

☐

Signed: _____   Date: _____

Signed: _____   Date: _____

Signed by the Authorised Signatory(ies) in accordance with the mandate held for your account.
